Experience

Frontend Developer (Intern)

Open Digital, 2022 - Present

Added new features and updated existing features for websites and applications using JQuery, NodeJS, Angular, and React. Created reusable tools and code libraries for frontend and API. Maintained and tested databases using SQL, Mongo, and more. Designed wireframes and mockups for frontend and mobile using Figma. Communicated with customers to define business needs and developed requirements.

Technology Support

Walker Brightwell Foundation, 2019 - Present

Board member and technology support for the foundation. Helped build website (716Forever.com) using Angular. Actively add new features and maintain frontend. Manage Confluence instance for foundation to organize documents and file sharing. Have awarded \$30,000 in scholarships to Turpin Highschool students since 2019.

Sr. Technical Recruiter

Sigil Partners, 2022 - 2022

Regularly tracked pipeline, priorities and performance data to share with internal stakeholders. Partnered with hiring managers to build and improve recruiting processes to develop selective and personalized sourcing strategies for each of their roles. Utilized database to store and view candidate and client data.

Sr. Technical Recruiter

Signature Consultants, 2021 - 2022

Worked to place candidates with a variety of clients like Bank of America, Wells Fargo, US Bank, Capital One, American Express, Publix, Apple, and Google. Ensured strong data integrity and recruiting metrics are well documented while continuously exceeding person key performance indicators.
